

## AWARD HISTORICAL

Ever since we first launched the application sometime in July 2010, our Fixed Asset Management System 1.0 (old naming) has been a great hit. Our counter shows that there were over 35,000 people around the world download our application in just less than 10 months with thousands register users.

Our sales and support were flooded with inquiries and comments (positive and enthusiastic feedback). It is indeed very exciting progress that drives us to perform better. Many download sites have awarded us with Editor Choice since.

We are listening to you. With all the feedback from our end-user, we are able to come out with better version. As a result, we are introducing *Fixed Asset Pro16* with complete new look, easier functionality, and much more comprehensive features.

*"Anything good does not have to be complicated and anything complex should do with few clicks away"* has become our philosophy in building a better solution.
